

Training type: **5ZŠ**

Subject: **Basic training**

Training period: **5 days**

- Day 1: Introduction.
Information on vehicle
Engine – theory, assembly data, lubrication, cooling, fuel supply.
Basic engine adjustment operations.
- Day 2: Basic engine adjustment operations applied,
MT30 control unit diagnostics carried out by INTEST 01 tester,
SCR diagnostics.
Transmission, auxiliary transmission – theory.
Basic transmission adjustment operations applied.
- Day 3: Differentials, axles, suspension, steering – theory.
Practical demonstration of axle assembly and disassembly.
Basic adjustment operations applied on axles, suspension and steering.
- Day 4: Brake system, body tilting mechanism.
Basic adjustment operations applied on brake system.
- Day 5: Wiring, diagnostics of in-vehicle electronic devices and equipment.
Conclusion.
